

Unit 1 – Nature and Perspectives of Geography

1. Briefly define and explain "geography." [4]
2. What two questions does Human Geography try to answer? [4]
3. Describe GIS and GPS. [12 & 14]
4. Contrast and provide examples of absolute and relative location, site and situation, and absolute and relative distance. [16-17]
5. Compare the natural and cultural landscape and describe how the attributes of places change over time. [20]
6. Define and provide examples for each of the following region types: functional, formal, and perceptual. [20-23]
7. Summarize the spatial concepts of density, dispersion/concentration, and pattern. [33-34]
8. Differentiate between relocation and expansion diffusion. Define and provide examples of the three types of expansion diffusion. [37-39]
