

# Industrial GMO Farms v. Local Organic Farms

**Directions:** Your group will be responsible for promoting either large GMO agriculture or local organic agriculture in a debate. (1) To do this, your group will assign 3 people to research each of the 5 aspects of your agricultural philosophy. Furthermore, your group should also assign 2 members to research the other philosophy's pros and 2 people to the cons. Please consider the validity of the sources you use (e.g. corporate greed & hippy fog). (2) After your group gathers the information, you should come together to debrief (i.e. everyone needs to understand and have the info written down for all 7 sections). (3) After your group has all of the information, you should compile a list of questions to ask the other group and prepare answers to expected questions from the other group. Everyone must participate in the debate.

1. What:

2. Brief History:

3. Today:

a. What it's used for:

b. Where it's used:

c. The extent of its use:

4. Pros:

5. Cons:

6. Other philosophy's pros:

7. Other philosophy's cons:
